DETAILED ACTION

1. Drawings filed on 3/20/2006 are accepted.
2. Claims 1 and 6-13 are allowed.

The following is an examiner's statement of reasons for allowance: the primary reason for allowance of claims 1, 6, and 7 is the inclusion of (1) the directional device having a circulator adapted for transmitting signals to antenna and receiving reflected signals from the antenna, (2) a slow wave structure coupled to the output of the circulator, and (3) the recited processor. The references of record fail to teach or suggest the recited combination of claims 1, 6, and 7.

Claims 8-13 are allowed because the references of record neither reveal nor render obvious the recited combination including a processor configured to generate a first control signal to control the matching network and a second control signal to control an amplifier of the transceiver, wherein the amplifier being coupled to an antenna through a matching circuit, based on the measured power of the transmitted signal and the measured power of the reflected signal, and a memory coupled to the control block and configured to store data for the control block. For these reasons, claims 1 and 6-13 are allowed.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
